SUMMARY

Software Engineer with 3+ years of experience building scalable microservices and backend systems using Java, Spring Boot, and Kafka on AWS. Experienced in distributed systems, event-driven architecture, and end-to-end delivery in Agile/Scrum teams.

EXPERIENCE

Paytm

Software Engineer

Feb 2025 – Present

Bengaluru, India

- Architected a multi-tenant SuperApp backend for international prepaid and postpaid SIM users, covering mobile recharge, plan activation, and entertainment services.
- Designed a Kafka event pipeline with idempotent consumers and DLQ handling to process 10K+ monthly events, reducing campaign setup time by 60% across Email, SMS, and WhatsApp channels.
- Engineered a CompletableFuture-based concurrent aggregation engine across Prepaid, Postpaid, and Fixed LOBs with AOP-driven audit logging capturing traceId, response time, and payload to MySQL.
- Reduced API response time from 800ms to 280ms by implementing Redis distributed caching across core service endpoints.
- Leveraged Cursor AI and MCP integrations to accelerate development, automate code generation, and enable efficient end-to-end debugging across distributed systems.
- Implemented distributed tracing using Micrometer, OpenTelemetry, and Zipkin, with ELK Stack and Kibana dashboards for centralized log analysis and root-cause analysis.

Quicktouch Technologies Limited

Software Engineer

May 2023 – Feb 2025

Delhi, India

- Contributed to a School ERP used by 3,500+ schools, working with cross-functional teams to deliver backend features and maintain system reliability.
- Designed and implemented a recruitment portal with job creation, category-based fee concessions, and applicant tracking, streamlining the end-to-end hiring workflow.
- Integrated WhatsApp notifications across core modules for real-time automated updates, driving a 25% increase in user engagement and responsiveness.
